

Addressing Substance Use Disorder in 2019: An Interprofessional Approach to Pain Management and Recovery *A Seven Part Series*

Chiropractic Pain Management Interventions

Presenter: Christine Goertz, D.C., PhD • **Facilitator:** David Schmitz, MD

To access this presentation, go to:

<https://razor.med.und.edu/cme/selfserve/web/online-courses>

Upon completion of this program, the learner will be able to:

1. Describe the prevalence, cost and public health impact, and common treatment approaches for low back pain in the United States
2. List 3 examples of nonpharmacological treatments recommended by the American College of Physician's (ACP) 2017 Guideline on Low Back Pain (LBP)
3. Discuss chiropractic education, standard chiropractic practices, the current evidence-base for chiropractic, Choosing Wisely recommendations, and what to consider when referring patients to a doctor of chiropractic

Who Should Attend?

All members of the healthcare team to include, but not limited to:

- Physicians, nurse practitioners, physician assistants, nurses, rehabilitation therapists, behavioral health providers, social workers, pharmacists, medication assisted treatment (MAT) prescribing providers, and prescribing providers interested in becoming MAT providers

Why Attend?

Because you will...

- Participate in case-based clinical discussions focused on the treatment of opioid use disorder.
- Gain up-to-date knowledge of opioid use disorder treatment through brief didactic presentations on topics of interest to learners
- Improve your confidence in managing patients with opioid use disorder
