

Project ECHO[®] Management of Opioid Use Disorder Clinic

“Trauma-informed Care & the Role of Adverse Childhood Events in Predisposing to Substance Use Disorder”

access this presentation, go to:

<https://razor.med.und.edu/cme/selfserve/web/online-courses>

Presented by

Robin Landwehr, DBH, LPCC, NCC

Christine Harsell, DNP, ANP-BC

Facilitator: Dave Schmitz, MD

Upon completion of this program, the learner will be able to:

1. Understand the benefits of screening for ACE in order to provide trauma-informed care
2. Describe the five characteristics of ACE
3. Understand how to implement screening in order to provide referrals and resources

Who should attend?

All members of the healthcare team to include, but not limited to: physicians, NPs, PAs, nurses, behavioral health providers, social workers, pharmacists, medication assisted treatment (MAT) prescribing providers, and prescribing

Why attend? Because you will...

- Participate in case-based clinical discussions focused on the treatment of opioid use disorder.
- Gain up-to-date knowledge of opioid use disorder treatment through brief didactic presentations on topics of interest to learners.
- Improve your confidence in managing patients with opioid use disorder.
