R-COOL-Health Scrubs Programs

Rural
Collaborative
Opportunities for
Occupational
Learning in Health
(R-COOL-Health)

ruralhealth.und.edu/scrubs

The Center for Rural Health offers three Scrubs programs: the R-COOL-Health Scrubs Academy I, R-COOL-Health Scrubs Academy II, and the R-COOL-Health Scrubs Camps.

The R-COOL-Health Scrubs programs are opportunities for North Dakota students to learn about careers in healthcare from healthcare professionals in fun, interactive ways. The Scrubs programs aim to increase awareness about multidisciplinary health careers and encourage students to pursue careers in healthcare.

The R-COOL-Health Scrubs

Academy I is a four-day/three-night camp held on the University of North Dakota campus and is open to any North Dakota junior high student who has completed grade 6, 7, or 8.

The R-COOL-Health Scrubs

Academy II is a four-day/three-night camp based out of Minot and is open to any North Dakota high school student who has completed grade 9, 10, or 11.

The R-COOL-Health Scrubs Camps

are one-day camps in rural communities. It involves a partnership that includes, at minimum, a local healthcare facility, economic or job development authority, and schoolwork to create a one-day camp for students to learn about careers in healthcare from local healthcare professionals.

“Scrubs Academy introduces kids to college life by bringing them on campus and exposes them to the wide range of opportunities in healthcare through exciting and fun hand-on activities. The ultimate goal is to plant the ‘seed’ that will result in growing our own workforce, using the most valuable North Dakota resource - our youth!”
